

CHIEF NOTES: MED/PEDS

(last updated 7/2011)

- **General**
 - Meet for Medicine and Pediatrics rounds, 8am or 10am on weekdays depending on the attending and the day. The R1 and R2 will meet the attending, and when available, the R3 will join rounds as well.
 - Peds Rounds are at 9 am daily
 - Everyone needs to go to Peds teaching rounds, weekdays AND weekends.
 - NIMP-I should attend Peds rounds even if they didn't admit a Peds patient
 - Chief A: Teams A and D
 - Chief B: Teams B and C
 - Make sure residents get feed back mid-way through the rotation and at the end
 - Make the list to redistribute Tuesday Peds patients before the end of conference and make sure the teams know where they are on the list for the following day.
- **Intake Days**
 - Post call intake rounds at 7AM: Past chiefs have provided breakfast for post-call teams. Some bring dinner the night before instead. It's up to your discretion.
 - Sign out is to happen at intake rounds, as each patient is being presented. Delegate tasks to MedPeds intern. Post-call resident and NIMP must be out of the hospital by 10am.
 - Dr Kory will come to intake rounds 8 am Monday, Tuesday, Thursday, and Friday on Med/Peds to assist the post-call medicine attending with seeing 23 hour observation patients. Her shift is 8am to noon each of those days and she will be joining morning report at 8am, so patients who might leave that day should be saved for 8 am. She will see up to 4 patients each day. She is then going to sign out to both the medicine attending prior to noon about the plan for those 4 patients. She is an attending so she doesn't do discharge papers etc.
 - Consider researching a topic on cases admitted during the day (pre 5pm).
 - Sign out to ICU and on call team at end of day. Supervise procedures for intern.
 - It's helpful to update the bulletin boards during sign out
 - Post-call note writing:
 - NO post call notes on medicine admissions are needed during the week.
 - Notes for Satellite Clinic and Heme-Onc admissions are needed. Weekend peds post call notes are not needed because the hospitalist will write them.
 - On weekends, old patients will need maintenance notes since attendings are not seeing them. Please help in this effort.
 - Bounce Backs
 - If a patient leaves the hospital and returns within the same 4 week rotation, they are readmitted to the same team, even if the problem is different.
 - A patient can bounce back out of the ICU to a MedPeds team if the attending of the MedPeds service has rounded on that patient, or if the MedPeds resident played a significant role in their admission.
 - AFMC patients:
 - Call/page your fellow resident to let them know to do their continuity note and to offer them the option to follow the resident with your admitting attending.
 - If the resident is on Medicine, he/she will follow the patient with the attending who is on call on the day of admission.
 - Attendings:
 - Clinic attendings that follow their own patients

- Wong, Helmer, Jorgenson, Schoeld, Rogers, Prichard, Castel, Patterson, Carvalho, Holbrook, Ippolitto, Araujo, Villasenor, Lambing
 - Heme/Onc
- **Cross Cover Days**
 - Responsible for covering your teams patients when they are OFF (R1/R2): write note for the day and discuss plan with appropriate attending(s).
 - There is no cap, but if you need help on weekends, call in HBU.
- **Medical students**
 - Orient/teach flow of the service so that they are able to enter into it.
 - Provide some expectations, including where to be and what to do.
 - They are expected to carry 2 patients and to admit 2 patients on call days. They are expected to stay until approximately 10pm on call days.
- **Teaching Rounds**
 - Monday: Tumor/Breast conference
 - Tuesday: EKG rounds (12:30), one chief needs to be there.
 - Wednesday: Peds teaching rounds (noon), choose a topic or patient for the week
 - Dr Flosi would like each chief to present at least once
 - Thursday: Medicine teaching rounds (noon)
 - decide between the two chiefs what case to present for Wednesday rounds. The attending to present is listed on the attending schedule.
 - Tumor/Chest: you are responsible for preparing the list. Consult w/ Dr. Slater, Surgery chief, other Med/peds chief and SLOB by Wednesday of each week so that Med Ed can gather charts & inform Radiologists & Pathologists. It can be helpful to send them an email on Tuesday as a reminder. Your list must be done by 3pm on Thursday.
