Creating and Organizing Order Favorites

By using favorites, clinicians can increase speed and efficiency by making favorites of those orders that are used frequently. Favorites can be accessed quickly without searching.

1. Go to Orders and click Add order.

2. Search for an order – e.g. (xr chest). For this example, choose XR Chest 2 views. Then follow the order procedure, choosing ordering physician, etc. and then click Done.
3. To add this order to your Favorites, right click on the order and choose **Add to Favorites . . .** from the drop down menu.

6. The favorite we are searching for is in the Radiology folder. Click on the folder and choose the order from your favorites. Click on the order and click Done.

7. Sign the order.

Organizing Favorites

1. To Organize Order favorites, click the star icon. There is a drop down arrow next to the star icon – click the drop down arrow and select Organize Favorites . . .

2. When the Organize Favorites window opens, you can create new folders, and drag and drop favorites into folders.
