Learning objective:

At the end of this session, participating residents will be able to lead inpatient work rounds, incorporating teaching appropriate to each learner's level of training.

Agenda:

12:00  Welcome
12:10  Go over plans for final session:
       Web links for teaching skills talks
12:15  Mock work rounds exercise with feedback
12:55  Introduction to lecturing: slides
       Go over new assignment: give mini-lecture at next session
Residents’ Self-Reported Learning Needs For This Session

“How to run work rounds, teaching asthma”

“How to get quick summary from medical student/interns, when to cut off and when to get more information from presentation”

“How not to be bossy, but have them generate their own ideas”

“Learn how to interrupt long presentations”

“Being efficient, giving feedback on management”

“Following up on patient care, use of antibiotics for asthmatic patient”

“I would like to have the H&P in front of me”

General Issues in Giving Feedback

“Giving constructive criticism”

“I would like to learn the best ways to approach a difficult resident. What do I need to do to get him/her in gear?”

“To be stern yet constructive”

“How do I impress on an intern that he/she may have made a fatal flaw without losing his/her responsiveness?”
**Mock work rounds exercise**

During this mock work rounds exercise, each participating resident will have a chance to act as the “supervising resident”. Each resident will be the teacher for five minutes, then will get feedback from the group. The next teacher will then step into the role and the action will continue from where the last teacher left off, which is sometimes called a “tag team” exercise. The specialty of the inpatient service automatically becomes that of the resident teacher (i.e., if the teacher happens to be a pediatrics resident, it’s the pediatrics service).

**Information for the resident teachers**

It is August and you are the supervising resident on your department’s ward service this month. This is your first day on the service. Since it’s still early in the academic year, all of the learners on the service today are new to you. You have about 45 minutes to supervise work rounds before the attending physician arrives for attending rounds. You are in charge and you can run rounds in whatever way you like.

**Information for the “learners”**

**Key characters**

**The post-call intern**

You were up all night and you are very tired. If you are not presenting a case or if rounds are not really interactive and interesting, you start to fall asleep. You ask to present the first case, your only admission last night, because you have to leave soon for morning clinic. You hope the sub-intern or third-year student will present your other mutual ongoing patient. Once or twice during rounds, you answer pages. Unless you are specifically asked not to by the resident teacher, you use the phone that’s sitting on the table to answer the pages.

**The aggressive, challenging third-year medical student**

You don’t think you are going to like this rotation. The resident team on your last rotation did very little teaching, which dampened your enthusiasm for your clerkships. You are following one patient with the sub-intern and post-call intern, but you forgot to bring your H&P and are not prepared to present the case. You tend to act aggressive during rounds and ask challenging questions. The only way the resident teacher can successfully “defuse” you is to convince you—in a pleasant manner—that after rounds you will mutually plan your role.

**The quiet first-year medical student**

You are a shy, quiet student assigned to this ward service as part of your clinical preceptorship this year. You have absolutely no idea what you are supposed to do with the inpatient team. You may have received some written instructions from the preceptorship director, but if you did, you must have lost them. You don’t speak unless spoken to and you try to slide through rounds without embarrassing yourself.
**Additional characters (if there are sufficient numbers of attendees)**

**The intern carrying the service pager**
You are carrying the service pager this morning. It keeps going off. Unless you are specifically asked not to by the resident teacher, you use the phone that’s sitting on the table to answer the pages from nurses and others, unintentionally disrupting rounds. You have a couple of fairly straightforward patients to present today; neither is a new patient. No students have been assigned to follow either of your patients yet.

**The competent fourth-year medical student (sub-intern)**
You are following one ongoing patient with the post-call intern, and you present this patient when it seems appropriate. (You are not following the patient whom the post-call intern admitted last night.) You answer and ask some clinical questions if encouraged to do so during rounds, and you also spending time clicking on your “personal digital assistant” looking for evidence-based medicine tips. You are going into the resident teacher’s specialty.

**The talkative second-year medical student**
You are a relatively talkative second-year student doing your clinical preceptorship. You are excited to be on this ward service but you don’t have much idea of what is going on during rounds. You are not sure what you are supposed to be doing today unless the resident helps explain it somehow. According to the preceptorship director, you are supposed to observe rounds and ask to get involved in doing an H&P.
Checklist for Giving Feedback on Teaching Cases: Work Rounds

The “LMNOPQRST” approach to small group teaching

Learners:

1. Did the resident encourage all learners to participate actively in rounds?
   _____ No  _____ Somewhat  _____ Yes

2. Did s/he ask all learners to introduce themselves at the start of rounds?
   _____ No  _____ Somewhat  _____ Yes

3. Did s/he make the learners feel comfortable admitting their limitations?
   _____ No  _____ Somewhat  _____ Yes

Microskills:

4. Did the teacher use the five microskills of clinical teaching, including specific positive and corrective feedback?
   _____ No  _____ Somewhat  _____ Yes

Needs:

5. Did your resident ask if the learners had any goals for rounds today or for further learning later (self-directed learning needs)?
   _____ No  _____ Somewhat  _____ Yes

6. Did s/he explain his or her own goals for rounds in a learner-centered way, including the overall goals of the inpatient service?
   _____ No  _____ Somewhat  _____ Yes

7. Did s/he prioritize goals, effectively balancing learning goals with service goals?
   _____ No  _____ Somewhat  _____ Yes

Organization:

8. Did the resident skillfully organize the teaching session?
   _____ No  _____ Somewhat  _____ Yes

9. Was the session paced well without dragging out or seeming rushed?
   _____ No  _____ Somewhat  _____ Yes

10. Did the teacher call attention to time and refocus the session as needed?
    _____ No  _____ Somewhat  _____ Yes
11. Did s/he discourage external interruptions (e.g., asking team members to limit phone calls and not use the phone in the room)?
   _____No  _____Somewhat  _____Yes

12. When teaching general rules, did s/he present teaching material in a well-organized manner?
   _____No  _____Somewhat  _____Yes

13. Did s/he generalize what could be learned about particular cases?
   _____No  _____Somewhat  _____Yes

**Presentations:**

14. Did the resident set and reinforce guidelines for presentations (how to present new patients and ongoing patients)?
   _____No  _____Somewhat  _____Yes

15. Did s/he encourage the team to listen to each presentation without interrupting?
   _____No  _____Somewhat  _____Yes

**Questions:**

**Recall:**

16. Did the resident ask helpful "recall questions" to probe the learners' knowledge base?
   _____No  _____Somewhat  _____Yes

**Synthesis:**

17. Did the resident ask "synthesis questions" to probe the learners' ability to analyze and synthesize information?
   _____No  _____Somewhat  _____Yes

18. Did s/he ask learners for a plan for the patient's problems?
   _____No  _____Somewhat  _____Yes

**Teaching:**

19. Did s/he encourage learners to explore specific learning resources (e.g., texts, articles, computer resources, conversations with consultants)?
   _____No  _____Somewhat  _____Yes

20. Did s/he tailor learning resources to the learners’ particular needs?
   _____No  _____Somewhat  _____Yes
**Evaluation: Work Rounds Module**

Please rate the quality of your learning experience for each part of this module, using the key below. A score of 4 indicates an average learning experience compared with the rest of your residency training.

<table>

<td>Good</td>
<td>Very good</td>
<td>Excellent</td>
<td>Wow!</td>
</tr>
</tbody>
</table>

1. Mini-lecture on work rounds  
   (at the end of the last session)  
   1 2 3 4 5 6 7

2. Mock work rounds exercise  
   1 2 3 4 5 6 7

3. Getting feedback from the class  
   1 2 3 4 5 6 7

4. **Work rounds module as a whole**  
   1 2 3 4 5 6 7

What did you like best about this module?

What could be improved about it?

What will you do differently after having participated?

Thanks!
